

Danvers Emergency Alert System Information

Danvers will use the **Blackboard System** to notify residents and businesses about issues that may affect their health or safety. Blackboard will allow the Town of Danvers to contact thousands of residents and businesses in seconds.

Blackboard System can deliver messages to you any way you want - on your home phone, cell phone, or email.

When the Town issues an alert about a potential safety hazard or concern, messages will be sent to voice and text communication devices, including land-line phones, cell phones, and e-mail.
