

# Danvers Electric Safety Corner

## June National Safety Awareness Month 2023

This year's theme is "Safety at Home". From identifying potential hazards in your home to practicing safe driving habits while out on the road, there are many ways we can all make a difference when it comes to keeping ourselves and those around us safe. Let's make June a month that encourages everyone to take action and prioritize safety!

### 1. Make safety a priority

Start by making safety a priority in your home, workplace, and community. Make sure that you are following safety protocols and that you are teaching others to do the same.

### 2. Create a safety plan

Sit down with your family and create a safety plan for your home, workplace, or community. Think about what steps you can take to be safe and make sure everyone knows what to do in case of an emergency.

### 3. Educate yourself

Take the time to educate yourself on safety protocols and best practices. Research different topics such as fire safety, food safety, and personal safety.

### 4. Check your equipment

Make sure that any equipment you use is up to date and in good working order. Check smoke detectors, fire extinguishers, fire alarms, and other pieces of equipment to make sure they are working properly.

### 5. Spread the word

Share safety tips with friends and family. Talk about how important it is to be safe and how we can all benefit from taking steps to protect ourselves.
